DETAILED ACTION

Claim Objections

1. Claims 15-17 and 21 are objected to because of the following informalities: claim 15 recited a transmitter comprising a control circuit. However, it is noted that the claimed "control circuit" (that is a single element) has not been recited in combination with any other circuit element(s) in the claim. The same comment applies equally to claims 16, 17 and 21. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Kanazawa et al US Patent No. 5,495,186. Kanazawa discloses a signal transmitter (fig.1) for transmitting a differential input signal pair to a transmission line via an external output terminal see output of circuit (N5 and n8), comprising a control circuit (N5 and N8) control by a control signal (n1 and n2) for defining a period (time point) for precharging the transmission line to a predetermined voltage level via the external differential output terminal before the defined period (first

time point) and transmitting the differential signal input to the transmission line see col. 2, lines 24-58.

Allowable Subject Matter

5. Claims 1-14 and 25-26 are allowed.

6. Claims 16-24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
